# GENIUSCHALLENGE

## STRUCTURES OF LIVING THINGS

1. True or false: all structures are made by humans. \_\_\_\_\_
2. Sort these into the correct category: skin, heart, eyes, lungs, brain, claws

Internal Structures

External Structures

3. What is the function of the water monitor lizard's claws?

\_\_\_\_\_

4. What is a disadvantage of having an exoskeleton?

\_\_\_\_\_

5. Fill in the blanks using the words **small** and **large**.

Very \_\_\_\_\_ seeds might allow them to be carried by the wind easier, while very \_\_\_\_\_ seeds provide the plant with additional nutrients to grow.

6. What type of animal has a structure that inspired humans to make glow sticks?

\_\_\_\_\_

7. What function might butterfly wings that look like leaves have?

\_\_\_\_\_

8. What is the function of the horn structures that some male beetles have on their heads?

\_\_\_\_\_

9. Name one structure that the whip spider has and mention its function.

\_\_\_\_\_

10. Explain one function of the tiny, needle-like leaves of a pine tree.
