Write an expression to solve each problem. Evaluate each to find the answer to the problem.

1. Rodrigo cut a 5-foot-long piece of wood into 12 strips of equal length. How long is each strip?

2. Craig bought a 3-foot-long baguette and made 4 equally-sized sandwiches with it. How long is each sandwich?

3. A baker made 9 cupcakes. Four people share them equally. How many cupcakes does each person get?

4. Five pounds of birdseed fill 4 identical bird feeders. How many pounds of birdseed go into each bird feeder?

5. If 1 sheep can produce 3 pounds of wool that are separated equally into 8 bags, how much wool is in each bag? How much wool is in two bags?
