1. Give an example that fits each description.

   a. A letter of the alphabet with no lines of symmetry.
   b. A letter of the alphabet with one line of symmetry.
   c. A letter of the alphabet with two lines of symmetry.

2. Draw all lines of symmetry or write “none” if there are none.

   a. A rectangle
   b. A parallelogram
   c. Equilateral triangle

3. Complete the other half of the drawing on the other side of the line of symmetry.
