1. Use an area model to find the product.

   a. \( 4 \times 86 = \) _____

   b. \( 6 \times 479 = \) ___

   c. \( 8 \times 3,215 = \) _____

   d. \( 27 \times 34 = \) ___

2. A stadium has 12 sections. Each section holds 185 people. How many people does the stadium hold? Use an area model to solve.

3. There are 38 rows of corn planted in a field. Each row contains 64 corn plants. How many corn plants are in the field? Use an area model to solve.
