1. Jaden has 3 bear puppets and 4 lion puppets.
   Kathy has 2 bear puppets and 5 lion puppets.
   Do Jaden and Kathy have the same number of puppets?

   $3 + 4 = \underline{7}$

   $2 + 5 = \underline{7}$

2. Jessica has 2 orange bears and some brown bears.
   She has 14 bears in all.
   How many brown bears does Jessica have?

   $\underline{2} + \underline{\text{brown bears}} = \underline{14}$

3. There were 8 dogs in the park. Some dogs went home.
   There are 3 dogs left at the park. How many dogs went home?

   $\underline{8} - \underline{\text{dogs went home}} = \underline{3}$

4. Terrence had some chickens. He gave 5 chickens away. Now he has 4 chickens.
   How many chickens did Terrence have at the start?

   $\underline{\text{chickens at start}} - \underline{5} = \underline{4}$
