EXTENDED PRACTICE
MENTAL MATH WITHIN 100

For each question below, describe how you would use mental math to solve the problem.

1. Your classroom has 12 red chairs and 11 blue chairs. How many chairs are there in total?

2. You are hosting a party. You need 16 cans of pop. You only have 7 in the fridge. How many more do you need to buy?

3. You have $50 in savings. You spend $30 on a new videogame. How much money do you have left?

4. Your classroom has 26 glue sticks. The classroom next door has 30 glue sticks. How many are there in total?

5. You are in the middle of solving an 86-piece jigsaw puzzle. You run out of pieces before you are done! You count only 70 pieces. How many are missing?
