
2. Maddie wants to score a basket on 60% of 50 shots. How many baskets does she need to make? Explain.

3. Laughlin is converting ratios to percents. In each solution, identify his error and correct it.

   a. \( \frac{3}{10} \)  
   \[ \frac{3}{10} = \frac{3}{10 \times 10} = \frac{3}{100} = 3\% \]

   b. \( \frac{4}{5} \)  
   \[ \frac{4}{5} = 4\% \]

4. Emma has completed 70% of her summer reading list. She has read 14 books so far. How many books are there on her summer reading list? Explain.
